# JAIDEEP GUPTA

Tableau Developer | Analytics Engineering
jaideepg.jg@gmail.com | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Tableau Developer with 4+ years of BI experience across healthcare, real estate, ed-tech and enterprise, building multi-page analytics apps, executive dashboards and standardized KPI frameworks for business and leadership teams. Delivered Tableau and Tableau Next solutions across 11 client engagements. Hands-on analytics engineering project work with dbt, Databricks/PySpark, Azure Data Factory, Kafka and Airflow; now extending into Snowflake and AWS.

## SKILLS

**BI & Visualization:** Tableau Desktop, Tableau Cloud, Tableau Pulse, Tableau Next, Power BI, DAX, Excel, Dashboard Design
**SQL & Data Modelling:** SQL, MySQL, CTEs, Window Functions, Dimensional Modelling, Star Schema
**Analytics Engineering:** dbt, ETL/ELT, Data Quality Testing, Data Reconciliation, Git, GitHub Actions (CI/CD)
**Data Platforms:** Databricks, PySpark, Delta Lake, Azure Data Factory, Azure SQL, Microsoft Fabric, Kafka, Airflow, Salesforce Data Cloud · Learning: Snowflake, AWS S3, Tableau MCP (Model Context Protocol)
**Python:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
**Analytics:** KPI Design, Funnel & Cohort Analysis, Product Analytics, Mixpanel

## EXPERIENCE

**Tableau Developer — Kloudrac Group** *Aug 2025 – Present*

- Delivered Tableau analytics for 11 client engagements across 6+ industries (healthcare, pharma, real estate, logistics, manufacturing, renewable energy), owning each from requirements gathering to dashboard handover.
- Built a 5-page Tableau app for an 8-hospital doctor-referral program (30K+ field visits, 3.8K referrals, 45+ reps), using drill-through actions, parameters and month-on-month calculations, so leadership could trace performance from network level down to individual reps in one place, supporting hospital-level program reviews.
- Standardized 6 program KPIs (engagement rate, conversion, visit compliance, TAT) with definitions documented inside the dashboard, so all 8 hospitals measured performance the same way.
- Built an executive revenue and inventory dashboard for a real-estate business, with quarter-on-quarter comparisons and 5-level sales-hierarchy filters, so management could track revenue against target, unbilled brokerage and unsold stock across 15+ projects from a single view.
- Built 6 Tableau Next POCs on Salesforce Data Cloud for manufacturing, real-estate and healthcare prospects, showing agentic analytics and AI-driven insights in client pre-sales.

**Data Analyst — Freelance** *Sep 2024 – Aug 2025*

- Delivered analytics projects for clients in Tableau, Power BI, SQL and Excel, covering data cleaning, KPI design and dashboard development.
- Built revenue, retention and lead-conversion dashboards that moved clients' recurring reporting from manual Excel files to interactive BI.
- Trained 50+ students and professionals in SQL, Tableau and Power BI.

**Associate Solution Leader — Brane Enterprises** *Jan 2024 – Sep 2024*

- Delivered BI and reporting projects for enterprise stakeholders end to end, from requirements gathering through stakeholder sign-off.
- Built reusable SQL templates and standardized KPI definitions so business teams reported with consistent metric logic instead of separate spreadsheet calculations.

**Subject Matter Expert → Product Analyst — TutorBin** *Jun 2022 – Dec 2023*

***Product Analyst (Sep 2023 – Dec 2023)***

- Used Mixpanel to analyse onboarding behaviour and identify funnel drop-off points, giving the product team evidence to prioritize experience improvements.
- Built dashboards tracking DAU, 30-day retention, conversion and feature adoption, giving product and leadership a consolidated view of user activity.
- Ran funnel and cohort analyses to compare user groups and inform feature prioritisation.

***Subject Matter Expert (Jun 2022 – Sep 2023)***

- Mentored 50+ students and professionals in statistics, SQL, Power BI and Tableau; developed practical analytics case studies.
- Supervised interns through structured guidance and regular progress reviews.

## PROJECTS

**AtliQ Commerce — End-to-End Data Platform** | *Azure Data Factory, Databricks, dbt, Kafka, Airflow*

- Batch: metadata-driven ADF ingestion → Databricks Bronze/Silver (Delta Lake, incremental MERGE) → dbt Gold star schema → Power BI / Microsoft Fabric.
- Streaming: Kafka → Spark Structured Streaming with watermarking, deduplication and Airflow orchestration.
- Quality: 13 dbt models and 18 tests gating GitHub Actions CI, revenue reconciliation, and an idempotency check (re-run the full pipeline and diff the results).
  GitHub

**Pharmacy Sales Dashboard** | *Tableau*

- 8-view Tableau dashboard for pharma sales managers: rep performance, doctor engagement, effort vs. output, target achievement and call-outcome quality.
  GitHub | Live Dashboard

**Business Insights 360** | *Power BI, SQL, DAX*

- Finance, sales, marketing, supply-chain and executive views over 1M+ transactions across 27+ markets on a star-schema model.
  GitHub | Live Dashboard

**AtliQ Hotels — Hospitality EDA** | *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Analysed ~134K bookings across a 6-table star schema with Pandas (multi-table merges, date features, groupby/pivot aggregations) to compare occupancy, revenue, booking channels and cancellation behaviour by city and room class.
  GitHub

## EDUCATION

**M.Sc. Economics — IIT Roorkee** *2017 – 2019*

**B.Sc. Statistics & Mathematics — CSJMU** *2014 – 2017*
